AMENDMENTS TO THE CLAIMS

This listing of the claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method implemented by a client application running on a client computer, said method comprising:

retrieving an address associated with a server that provides a geolocating service to users who transfer electronic documents to that address electronic documents that include unstructured text, said geolocating service involving analyzing the unstructured text within the electronic documents that are electronically transferred to that address by remotely located client applications to identify one or more spatial identifiers and from that analysis generating geolocation information for those one or more spatial identifiers found within the electronic documents files;

identifying at said client application a client document that includes unstructured text; and

electronically transferring the identified client document to the address of the geolocating service so as to receive the geolocating service for the unstructured text within the identified client document.

2. (Currently Amended) The method of claim 1 further comprising:
electronically receiving back from said server said document and geolocation information that was generated for the unstructured text within said identified client document by said server.

3. (Currently Amended) The method of claim 1 further comprising:
identifying at the first-mentioned client computer a plurality of client documents for which geolocation information is desired, said first-mentioned client document being among said plurality of client documents and each of said plurality of documents including corresponding unstructured text; and

2

electronically transferring the identified plurality of client documents to the address of

the geolocating service so as to receive the geolocating service for the <u>unstructured text within</u>

<u>the</u> identified plurality of client documents.

4. (Currently Amended) The method of claim 3 further comprising:

electronically receiving back from said geolocating service ~~said plurality of documents and~~

geolocation information that was generated by said geolocating service for <u>the unstructured text</u>

<u>within</u> each of said plurality of documents.

5. (Currently Amended) The method of claim 4 further comprising:

electronically receiving back from said geolocating service spatial identifiers that were

~~generated for~~ <u>identified within the unstructured text within</u> each of said plurality of documents

by said geolocating service.

6. (Original) The method of claim 4 further comprising:

electronically receiving back from said server a spatial document index that was

generated for said plurality of documents by said geolocating service.

7. (Currently Amended) The method of claim 1 wherein ~~the~~ retrieving <u>an address</u>

involves searching on the Internet for said address associated with the server that provides a

geolocating service to users.

8. (Currently Amended) The method of claim 1 wherein ~~the~~ retrieving <u>an address</u>

involves reading said address from a local memory.

9. (New) The method of claim 2 further comprising:

electronically receiving back from said server said client document along with the geolocation

information that was generated for the unstructured text within said identified client document

by said server.

10. (New) The method of claim 2 further comprising:

electronically receiving back from said geolocating service spatial identifiers that were

identified within the unstructured text within said client document by said geolocating service.

11. (New) The method of claim 4 further comprising:

electronically receiving back from said geolocating service said plurality of documents as well as with the geolocation information that was generated by said geolocating service for the unstructured text within each of said plurality of documents.
